

22nd July 2008

To whom it may concern,

I wanted to take this opportunity, as an extremely satisfied customer, to make sure that I acknowledge a job well done.

Ross Arvanitakis and the team at Advanced Media Solutions have assisted me in transforming my front window display from a standard paper laminated window display, to a much more sophisticated LCD monitor display known as IVISUAL.

His attention to detail and outstanding customer service skills enabled the transition of our window display to be a very easy one, with a perfectly orchestrated changeover which created little to no disruption to the office.

Advanced Media Solutions have installed a product IVISUAL which I see as faultless and extremely user friendly. Our display is consistently up to date with an automated updating system enabling even the newest of properties to appear in our window almost as quickly as a push of a button.

Running a successful Real Estate Office, is certainly not just about customer service, just as important is reputation and image. Our new window display has set us apart from our competitors and has become a significant point of difference from other agencies in our area.

I highly recommend Advanced Media Solutions and this outstanding product and service.

Yours faithfully,
RAY WHITE GLEN WAVERLEY
